THE ULTIMATE COMPETITIVE ADVANTAGE

CONTENTS

INTRODUCTION

Trust is the one thing that, if developed and leveraged, has the potential to create unparalleled success and prosperity in every dimension of life. Trust impacts us 24/7, 365 days a year. It undergirds and affects the quality of every relationship, every communication, every project, and every business venture—every effort in which we are engaged. It changes the quality of every present moment and alters the trajectory and outcome of every future moment of our lives—both personally and professionally. Contrary to popular belief, trust is something you can do something about. In fact, nothing is as fast as the speed of trust.

WHAT YOU WILL LEARN

In this summary, you will learn:

- The economics of trust and its effect on speed and cost.
- The roles of character and competence in building trust.

- The 5 Waves of Trust
  - The First Wave: Self Trust
  - The Second Wave: Relationship Trust
  - The Third Wave: Organizational Trust
  - The Fourth Wave: Market Trust
  - The Fifth Wave: Societal Trust
- The 4 Cores of Credibility®.
- The 13 Behaviors® shared by those in high-trust relationships.
- The seven low-trust organizational taxes and dividends.
- Extending "Smart Trust®" using the "Smart Trust" Matrix.
- Restoring trust when it has been lost.

A CRISIS OF TRUST

It is tempting to see trust as binary—you either have it, or you don't. But it is possible to increase trust much faster than we think. Simply put, trust means confidence. The opposite of trust, distrust, is suspicion. Relationships are built on and sustained by trust and can be broken and destroyed by a lack of trust. When you trust people, you have confidence in them—in their integrity and in their abilities. When you distrust people, you are suspicious of them—of their integrity, their agenda, their capabilities, or their track record. Low trust is everywhere. It permeates our global society, our marketplace, our organizations, our relationships, our personal lives. It breeds suspicion and cynicism, which becomes self-perpetuating, resulting in a costly, downward cycle.

ECONOMICS OF TRUST

Trust always affects two measurable outcomes, speed and cost. When trust goes down, speed goes down and costs go up.

$$\downarrow \text{Trust} = \downarrow \text{Speed} \uparrow \text{Cost}$$

When trust goes up, speed goes up and costs go down.

$$\uparrow \text{Trust} = \uparrow \text{Speed} \downarrow \text{Cost}$$

Consider the speed and cost of air travel since 9/11. While the added measures have had their intended effect on safety, the lower levels of trust have increased ticket prices (via new security taxes) and forced passengers to arrive earlier and take more time moving through the check-in and security lines. By contrast, Warren Buffett struck a major acquisition deal after only a two-hour meeting and a handshake. High trust, high speed, low cost.

THE HIDDEN VARIABLE

In many interactions, we are paying a hidden low-trust tax—and we don't even know it! You've undoubtedly seen this tax in action many times, perhaps in conversations where you can tell that your boss, your teenager, or someone else is automatically discounting everything you say. Whether trust is high (receiving a dividend) or low (imposing a tax), trust is the "hidden variable" in the formula for organizational success. The traditional business formula is:

$$S \times E = R$$

(Strategy times Execution equals Results)

The hidden variable to this formula is trust—either the low-trust tax, which discounts the output, or the high-trust dividend, which multiplies it:

$$(S \times E)T = R$$

([Strategy times Execution] multiplied by Trust equals Results)

A company can have an excellent strategy and a strong ability to execute, but the net result can be either torpedoed by a low-trust tax or multiplied by a high-trust dividend. The ability to establish, grow, extend, and restore trust with all stakeholders, customers, business partners, investors, and co-workers is the key leadership competency of the new global economy.

TRUST MYTHS

Consider some of the debilitating myths that keep individuals from enjoying the dividends of high trust:

MYTH	REALITY
Trust is soft.	Trust is hard, real, and quantifiable. It measurably affects both speed and cost.
Trust is slow.	Nothing is as fast as the speed of trust.
Trust is built solely on integrity.	Trust is a function of both character (which includes integrity) and competence.
You either have trust or you don't.	Trust can be both created and destroyed.

MYTH	**REALITY**
Once lost, trust cannot be restored.	Though difficult, in most cases lost trust can be restored.
You can't teach trust.	Trust can be effectively taught and learned, and it can become a leverageable, strategic advantage.
Trusting people is too risky.	Not trusting people is a greater risk.
Trust can only be built face-to-face.	Trust can be built on virtual teams and in digital environments.
Trust is established one person at a time.	Establishing trust with the one establishes trust with the many.

YOU CAN DO SOMETHING ABOUT THIS!

Who do you trust? A friend? A work associate? Your boss? Your spouse? A parent? A child? Why do you trust this person? Now consider an even more provocative question: Who trusts you? People at home? At work? Someone you just met or someone you have known for a long time? What is it in you that inspires the trust of others? Most of us tend to think about trust in terms of character, of being a good or sincere person. But trust based on only character is a myth. Trust is a function of two things:

- Character—your integrity, motive, and intent with people.
- Competence—your capabilities, skills, results, and track record.

While it may come more naturally for us to think of trust in terms of character, it's equally important that we also learn to think in terms of competence. Recognizing the role of competence helps us identify and give language to underlying trust issues we otherwise can't put a finger on.

THE 5 WAVES OF TRUST

Trust works from the inside out. The “ripple effect” metaphor graphically illustrates the interdependent nature and flow of trust through 5 waves. It defines the five levels, or contexts, in which we establish trust. It also forms the structure for understanding and making trust actionable.

- **Self Trust**—the integrity, intent, capabilities, and results that make you believable. The key underlying principle is credibility.
- **Relationship Trust**—how we interact and establish “Trust Accounts” with others. The key underlying principle is consistent behavior.
- **Organizational Trust**—how leaders promote organizational integrity, intent, capabilities, and results. The key underlying principle is alignment.
- **Market Trust**—impact of trust on your brand. The key underlying principle is reputation.
- **Social Trust**—how we create value for others. The key underlying principle is contribution.

THE FIRST WAVE: SELF TRUST

Self Trust is all about credibility—the integrity, intent, capabilities, and results that make you believable. It boils down to two questions:

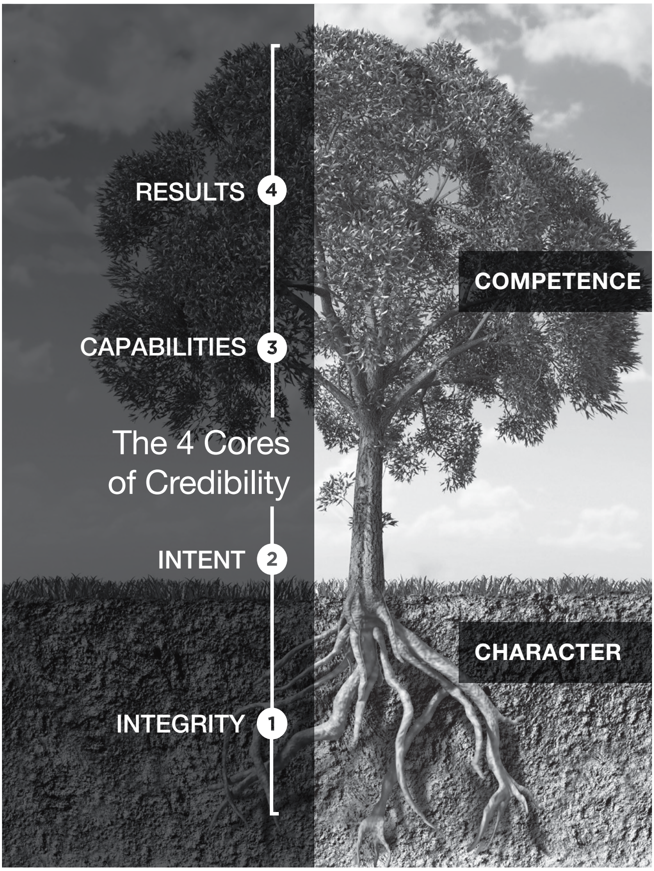
- Do I trust myself?
- Am I someone others can trust?

Credibility consists of 4 Cores® (the first two deal with character, the second two deal with competence):

1. Integrity
2. Intent
3. Capabilities
4. Results

The 4 Cores can be visualized through the metaphor of a tree. Integrity is essentially below the surface—it is the root system out of which everything else grows. Intent becomes somewhat more visible—it is the trunk that emerges from beneath the surface out into the open. Capabilities are the branches—the capacities that enable us to produce. Results are the fruits—the visible, tangible, measurable outcomes that are most easily seen and evaluated by others.

NOTE: Each of the 4 Cores chapters have a section on "How to Increase" that particular Core. This summary identifies the "How to Increase…" section for two of the 4 Cores.



CORE 1 — INTEGRITY

In the tree metaphor, integrity is the root. We've all seen people with enormous capability, strong results, even sometimes good intent, who unfortunately go about what they're doing in a dishonest or unprincipled way. It's the "ends justify the means" mentality. It leads to manipulation, deceit, fraud, extortion, and scandal. To most people, integrity means honesty. While integrity includes honesty, there are three additional qualities that are equally vital:

- **Congruence**—A person has congruence when there is no gap between intent and behavior.
- **Humility**—A person has humility when he or she is more concerned about what is right than about being right.
- **Courage**—A person has courage when he or she does the right thing—even when it's hard.

HOW TO INCREASE INTEGRITY

1. Make and keep commitments to yourself.

There is absolutely nothing you can do that will increase integrity faster than learning how to make and keep commitments to yourself. Keep these suggestions in mind:

- Don't make too many commitments.
- Treat commitments you make to yourself with as much respect as you do the commitments you make to others.
- Don't make commitments impulsively.
- Understand that when keeping your commitments becomes hard, you have two choices: You can change your behavior to match your commitment, or you can lower your values to match your behavior.

2. Stand for something.

If you're going to have integrity, you have to have a core—something to which you must be true. You can't work from the inside out if you don't even know what's inside. You need to have identified values. You need to know what you stand for, and you need to stand for it so that others know too.

3. Be open.

Openness is vital to integrity. It takes both humility and courage—the humility to acknowledge that there are principles out there you may not currently be aware of, and courage to follow them once you discover them. Throughout history, most Paradigm Shifts in science have been shifts from traditional thinking, shifts that took this kind of humility and courage. A good way to increase integrity is to work on being open.

CORE 2—INTENT

The second core deals with issues of intent. Intent is about our motive, our agenda, and the resulting behavior. Trust grows when our motives are straightforward and based on mutual benefit; in other words, when we genuinely care not only for ourselves, but also for the people we interact with, lead, or serve. When we suspect a hidden agenda from someone, or we don't believe they are acting in our best interests, we are suspicious about everything they say and do.

As illustrated in the tree metaphor, intent is represented by the trunk, partly unseen underground, partly visible above. While our motives and agendas are deep inside our own hearts and minds, they become visible to others through our behavior. A person with integrity, capabilities, and results—but poor, unclear, or self-serving intent—will always pay a trust tax.

What is intent exactly? Consider the following three dimensions:

- **Motive**—your reason for doing something. It's the "why" that motivates the "what."
- **Agenda**—what you intend to do or promote because of your motive. It's not just that you care about others; you also genuinely want them to win.
- **Behavior**—acting in the best interest of others. When we do so, we clearly demonstrate the intent of caring and the agenda of seeking mutual benefit. It's easy to say "I care" and "I want you to win," but it is our actual behavior that demonstrates whether we mean it.

Research shows:

- Only 29 percent of employees believe that management cares about them developing their skills.
- Only 42 percent believe that management cares about them at all.

What kind of impact is that having on trust and on the speed and cost required in these organizations to get things done?

It's important to keep in mind that sometimes, unfortunately, poor behavior turns out to be a bad execution of good intent. People typically judge us, and we judge them, based on observable behavior. Thus, we need to do all we can to ensure that our behavior accurately reflects our true motives and agendas.

HOW TO IMPROVE INTENT

Fundamentally, intent is a matter of the heart. Some people genuinely have poor intent. Though they may not be aware of it or even admit it, deep inside, they seek their own profit, position, or possessions above people, above principle, above everything else. Although people may tend to fake positive intent, ultimately, people can sense it. Intent is something you can definitely work on and improve. Many people naturally have good intent—they sincerely want to do what's right and seek the welfare of others, but their expression or execution of intent is poor. The challenge, then, is to improve intent and get better at expressing it. Here are three intent accelerators:

- **Examine your motives**—Examine your motives by asking soul-searching questions such as: Are my interactions motivated by genuine caring, concern, or love? Am I really seeking another's best interests, or am I just trying to win? Do I acknowledge contribution? Do I want what's best for everyone?
- **Declare your intent**—Declaring your intent and expressing your agenda and motives can be very powerful, particularly if your behavior is being misinterpreted or misconstrued by others. It's also valuable as a means of establishing trust in new relationships.
- **Choose abundance**—Abundance means that there is enough for everybody. The opposite—scarcity—says that there is only so much to go around, and if you get it, I won't. While scarcity may be a reality in some areas, in most of the important things in life—such as love, success, energy, results, and trust—abundance is not only a reality, it is an attractor and generator of even more.

CORE 3—CAPABILITIES

Going back to the metaphor of the tree, capabilities are the branches that produce the fruits or results. Capabilities are vital to creating credibility—both personally and organizationally. Our capabilities inspire the trust of others. Our capabilities also give us the self-confidence that we can do what needs to be done.

One way to think about the dimensions of capabilities is to use the acronym "TASKS":

- **T**alents—our natural gifts and strengths. It is good to remember the importance of developing our talents and the credibility we create and the trust we inspire when we do. In the end, our greatest work and contributions flow from our talents.
- **A**ttitudes—our paradigms; our way of seeing and our way of being. What are my attitudes about work? About life? About learning? About myself, my capabilities, and my opportunities to contribute?
- **S**kills—our proficiencies. What skills do I currently have? What skills will I need in the future? To what degree am I involved in upgrading my skills?
- **K**nowledge—our learning, insight, understanding, and awareness. What is my current level of knowledge in my specific field? What am I doing to stay current? What other areas of knowledge am I pursuing?
- **S**tyle—our unique approach and personality. How effective is my current style in approaching problems, opportunities, and interacting with others? Does my approach facilitate or get in the way of accomplishing what needs to be done?

CORE 4—RESULTS

Results matter! They matter to your ability to establish and maintain trust with others. Results give you clout. They classify you as a producer and performer. Without the results, you simply don't have that same kind of clout or credibility. Returning to the metaphor of the tree, results are the fruits—the tangible, measurable end purpose and product of the roots, trunk, and branches.

THE SECOND WAVE: RELATIONSHIP TRUST

The second wave—Relationship Trust—is about how to establish and increase the "Trust Accounts" we have with others through consistent behavior. By behaving in ways that build trust, you make deposits. By behaving in ways that destroy trust, you make withdrawals. The "balance" in the account reflects the amount of trust in the relationship at any given time. This concept highlights some important realities:

- Each Trust Account is unique.
- All deposits and withdrawals are not created equal.
- What constitutes a "deposit" to one person may not to another.
- Withdrawals are typically larger than deposits.
- Sometimes the fastest way to build trust is to stop making withdrawals.
- Recognize that each relationship has two Trust Accounts: the way you see the account, and the way the other person sees it.

THE 13 BEHAVIORS®

There are 13 Behaviors common to all high-trust people. These behaviors are powerful because they are based on the principles that govern trusting relationships. They grow out of the 4 Cores. They are actionable and universal.

The 13 Behaviors require a combination of both character and competence; the first five flow initially from character, the second five from competence, and the last three from an almost equal mix of character and competence.

NOTE: Each of these 13 Behaviors also has an opposite and a counterfeit. This summary identifies the opposite and counterfeit in three of the 13 Behaviors.

BEHAVIOR 1: TALK STRAIGHT

Talk Straight is honesty in action. It's based on the principles of integrity, honesty, and straightforwardness. It means two things: to tell the truth and to leave the right impression. This means:

- Communicating so clearly that you cannot be misunderstood.
- Letting people know where you stand.
- Using simple language.
- Calling things what they are.
- Demonstrating integrity.
- Not manipulating people or distorting facts, spinning the truth, or leaving false impressions.

OPPOSITE: To lie or deceive.
COUNTERFEIT: "Spinning," positioning, posturing, and manipulating. Withholding information, "beating around the bush," double-talking, and flattering. "Corporate speak." Technically telling the truth, but leaving the wrong impression.

BEHAVIOR 2: DEMONSTRATE RESPECT

Behave in ways that show fundamental respect for people, and demonstrate caring and concern. Demonstrate Respect is based on the principles of respect, fairness, kindness, love, and civility.

BEHAVIOR 3: CREATE TRANSPARENCY

Create Transparency is about being open. It's about being real and genuine—telling the truth in a way people can verify. It's based on the principles of honesty, openness, integrity, and authenticity.

BEHAVIOR 4: RIGHT WRONGS

Righting wrongs is more than simply apologizing—it's also about making restitution. It's making up and making whole. Right Wrongs is based on the principles of humility, integrity, and restitution.

BEHAVIOR 5: SHOW LOYALTY

Showing loyalty means we speak about people as if they were present, and that we give credit to others. By showing loyalty we can make huge deposits in the Trust Account—not only with the person you show loyalty to, but also with everyone who becomes aware that you do it. Show Loyalty is based on the principles of integrity, loyalty, gratitude, and recognition.

BEHAVIOR 6: DELIVER RESULTS

Delivering results is based on the principles of responsibility, accountability, and performance. It's one of the best ways to build trust quickly or restore trust when it has been lost. Practice delivering results by:

- Establishing a track record of results.
- Getting the right things done.
- Making things happen.
- Accomplishing what you're hired to do.
- Being on time and within budget.
- Not overpromising or underdelivering.
- Not making excuses.

OPPOSITE:	To perform poorly or fail to deliver.
COUNTERFEIT:	Delivering activities instead of results. Doing busywork or "fake work" without accomplishing real work. Overpromising and underdelivering.

BEHAVIOR 7: GET BETTER

When people see you as a learning, growing, renewing person—or your organization as a learning, growing, renewing organization—they develop confidence in your ability to succeed. This enables you to build high-trust relationships and move with incredible speed. Get Better is based on the principles of continuous improvement, learning, and change.

BEHAVIOR 8: CONFRONT REALITY

Confronting reality is about taking the tough issues head-on. It's about addressing the bad news as well as the good. You're directly addressing the difficult issues that are in people's minds. Confront Reality is based on the principles of courage, responsibility, awareness, and respect.

BEHAVIOR 9: CLARIFY EXPECTATIONS

Clarifying expectations is creating a shared vision and agreement about what is to be done up front. By doing so, you avoid heartaches and headaches later on. Clarify Expectations is based on the principles of clarity, responsibility, and accountability.

BEHAVIOR 10: PRACTICE ACCOUNTABILITY

Clarify Expectations precedes this behavior because you can Practice Accountability far better when you have clarified expectations first. It's hard to hold someone accountable if they're not clear on what the expectations are.

BEHAVIOR 11: LISTEN FIRST

Listen First means not only to really listen (to genuinely seek to understand another person's thoughts, feelings, experience, and point of view), but to do it first (before you try to diagnose, influence, or prescribe). The principles behind Listen First include understanding, respect, and mutual benefit.

BEHAVIOR 12: KEEP COMMITMENTS

Keeping or breaking commitments is the fastest way there is to build or destroy trust. Keep Commitments is based on the principles of integrity, performance, courage, and humility. To violate commitments causes doubt, suspicion, cynicism, and distrust. Keeping commitments generates hope, enthusiasm, confidence, and trust which increases momentum and the accomplishment of results.

BEHAVIOR 13: EXTEND TRUST

Extend Trust is different from the rest of the behaviors in that it's about shifting from "trust" as a noun to "trust" as a verb. While the other behaviors help you become a more trusted person or manager, this behavior will help you become a more trusting leader. Extend Trust is based on the principles of empowerment, reciprocity, and a fundamental belief that most people are capable of being trusted. Practice extending trust by:

- Demonstrating a propensity or willingness to trust.
- Extending trust abundantly to those who have earned it.
- Extending trust conditionally to those who are earning yours.

- Extending trust based on the situation, risk, and credibility (character and competence) of the people involved.
- Not withholding trust because there is risk involved.

OPPOSITE:	To withhold trust.
COUNTERFEIT:	Extending "false trust"—giving people the responsibility, but not the authority or resources. Extending "fake trust"—acting like you trust someone, but then micromanaging and hovering over him or her.

THE THIRD WAVE: ORGANIZATIONAL TRUST

When looking at the impact of a high-trust culture and contrasting that with a low-trust culture, most people not only see that distrust has infiltrated their workplace, but the effects of distrust are seen daily. It's not just violating the 4 Cores and 13 Behaviors; it's also violating the principles of organizational design that create alignment with the cores and behaviors. It happens when people, particularly leaders, blame the behaviors of people in the organization on a low-trust environment without understanding their own responsibility to create, deploy, and maintain systems that promote an environment of high trust.

In organizations, symbols of trust will start to become evident. Symbols are powerful and carry disproportionate value. It's been said that "a picture is worth a thousand words," and the same can be said of symbols. They can be either positive or negative, and they can take many forms, including:

NOTE: When reading and engaging in the third, fourth, and fifth waves, define your "organization" on the most actionable level—in other words, in the most relevant context in which you have stewardship i.e., your team, or department, or organization as a whole.

- Tangible objects
- Systems or processes
- Consistently applied behaviors
- Legendary stories
- The 500-page employee handbook

When behavior inside a team or organization is misaligned with its values, negative symbols will begin to emerge, which will communicate and cultivate distrust. Returning to the 4 Cores and 13 Behaviors will help turn symbols of distrust to symbols of trust.

The 4 Cores and 13 Behaviors are your tools. They enable you to create significant shifts and dramatically improve all areas of organizational performance. This language, framework, and process will help you to see how trust affects every relationship and outcome in your organization, to speak about trust in a way that promotes understanding, dialogue, and problem solving, and to behave in ways that build trust. They empower you, as a leader, to create a high-trust organization.

THE SEVEN LOW-TRUST ORGANIZATIONAL TAXES

If trust is low, you are paying a wasted tax. Consider the "hidden taxes" you might be paying in your organization:

- **Redundancy**—unnecessary duplication.
- **Bureaucracy**—complex and cumbersome rules.
- **Politics**—the use of tactics and strategies to gain power.
- **Disengagement**—having people who are working for a company but have effectively quit trying.
- **Turnover**—the loss of desired performers.
- **Churn**—the turnover of stakeholders.

- **Fraud**—the enormous cost and disruption of dishonesty, sabotage, obstruction, and deception.

THE SEVEN HIGH-TRUST ORGANIZATIONAL DIVIDENDS

Now consider the dividends of high trust in an organization:

- **Increased Value**—for both shareholders and customers.
- **Accelerated Growth**—high-trust companies simply outperform low-trust companies.
- **Enhanced Innovation**—high-trust companies produce cultures of strong innovation.
- **Improved Collaboration**—high-trust environments foster the collaboration and teamwork required for success.
- **Stronger Partnering**—partnering relationships that are based on trust have dividends up to 40 percent of the value of the contract.
- **Better Executio**n—high-trust companies are better able than low-trust companies to execute their organization's strategies.
- **Heightened Loyalty**—high-trust companies elicit far greater loyalty from their primary stakeholders, workers, customers, suppliers, distributors, and investors.

When you add up all the dividends of high-trust, and put those on top of the fact that high trust decreases or eliminates all the taxes listed, there is no doubt that there is a significant, direct, measurable, and indisputable connection between high-trust, high-speed, low-cost, and increased value.

THE FOURTH WAVE: MARKET TRUST

At the market level, almost everyone clearly understands the impact of trust. The underlying principle behind Market Trust is reputation. It's about your company brand reflecting the trust customers, investors, and others in the marketplace have in you. When there is a high-trust brand, customers buy more, refer more, give the benefit of the doubt, and stay with you longer. Consider the perspective of your customers through the lens of the 4 Cores of Credibility and ask:

- Does my brand have Integrity?
- Does my brand demonstrate good Intent?
- Does my brand demonstrate Capabilities?
- Is my brand associated with Results?

If you don't have the brand or reputation you desire, the 4 Cores provide a great diagnostic tool to help you pinpoint the reason why and the area where investment will bring the greatest returns.

On the most micro level, every individual has his or her own brand or reputation that affects trust, speed, and cost. It comes across in your résumé, in comments from your references, and it translates into how people interact with you in social situations. If your personal brand is suffering, determine whether the problem is one of character (Integrity or Intent) or competence (Capabilities or Results). Zero in on the area where improvement will have the greatest positive effect.

THE FIFTH WAVE: SOCIETAL TRUST

Societal Trust is about creating value for others and for society at large. The principle here is contribution. By contributing or "giving back," we counteract the suspicion, cynicism, and low-trust inheritance taxes within our society. We also inspire others to create value and contribute as well. Trust is an integral part of the fabric of our society—we depend on it. Without trust, society closes down and will ultimately self-destruct.

Think about the taxes imposed in a closed, low-trust society. Consider all the dividends that are not available—such as shared knowledge, medical breakthroughs, technological advances, economic partnerships, and cultural exchanges. In a high-trust society, there's more for everyone. We interact with less friction, resulting in greater speed and lower cost. This is why our opportunity to build a high-trust society is so meaningful.

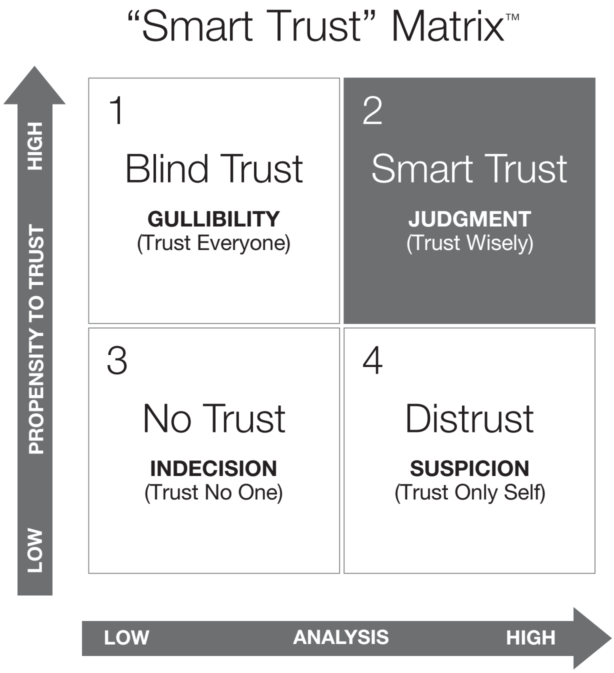
From contribution flows the intent to create value instead of destroying it. Many businesses recognize the value of contribution, showing that doing good is no longer seen as something in addition to business—it is a part of business itself.

At the heart of organizational global citizenship is individual global citizenship. It's you and me making the conscious decision to value and invest in the well-being of others. It's you and me carrying out that decision in every dimension of our lives.

EXTENDING "SMART TRUST"

When you're dealing with trust, it seems there are two extremes. On one end of the spectrum, people don't trust enough. On the other end, people are too trusting. Extending trust can bring great dividends, but it can also create the possibility of significant risk. So how do you extend "Smart Trust" in a way that maximizes the dividends and minimizes the risk? The objective is not to avoid risk. Instead, the objective is to manage risk wisely—to extend trust in a way that will avoid the taxes and create the greatest dividends over time. Learning how to extend Smart Trust is a function of two factors:

- **Propensity to Trust.** Propensity to trust is the tendency, inclination, or predisposition to believe that people are worthy of trust and a desire to extend it to them freely.
- **Analysis.** Analysis is the ability to analyze, evaluate, theorize, consider implications and possibilities, and come up with logical decisions and solutions.



"SMART TRUST" MATRIX

Smart Trust occurs when there is both a high propensity to trust and high analysis. Consider how the four zones function within the "Smart Trust" Matrix:

Zone 1 (high propensity to trust; low analysis) is the "blind trust" zone of gullibility. Here is where you find those who fall for Internet, marketing, investment, and other scams.

Zone 2 (high propensity to trust; high analysis) is the "Smart Trust" zone of judgment. This is where you combine the propensity to trust with the analysis to manage risk wisely. This is where you get both good business judgment and good people judgment—including enhanced instinct and intuition. Smart Trust doesn't mean that you extend trust to everyone.

Zone 3 (low propensity to trust; low analysis) is the "No Trust" zone of indecision. People here tend not to trust anyone. Because their own analysis is low, they tend to not even trust themselves. This zone is characterized by indecision, insecurity, protectiveness, apprehension, and immobilization.

Zone 4 (low propensity to trust; high analysis) is the "Distrust" zone of suspicion. This is where you find people who extend trust very cautiously or not at all. People in this zone tend to rely almost exclusively on analysis for all evaluation, decision making, and execution.

RESTORING TRUST WHEN IT HAS BEEN LOST

Broken trust creates pain, disappointment, and loss. It wreaks havoc with relationships, partnerships, plans, dreams, and enterprises of all kinds. There are situations in which trust cannot be restored. In fact, there may not even be an opportunity to try to restore it. Thus, the best approach is to never violate trust in the first place. Trust is not something to be taken for granted. However, the nature of life is such that all of us will undoubtedly have to deal with broken trust at some time.

The idea that trust cannot be restored once it is lost is a myth. Though it may be difficult, in most cases, lost trust can be restored—and often enhanced! One of the greatest obstacles to building and restoring trust is the superficial, two-dimensional paradigm that the ideal life is challenge-free. It's not. We are going to have challenges. We are going to make mistakes, and others are going to make mistakes that affect us. The issue is how we respond to those things.

In most cases, prioritizing trust—actively seeking to establish it, grow it, restore it, and wisely extend it—will bring personal and organizational dividends that far exceed any other path. Even if trust is not restored in the particular relationship you're working on, your efforts to restore it will increase your ability to build trust in other relationships.

As in almost every other aspect of life, breakdowns can create break-throughs. Challenges and mistakes can become some of our greatest opportunities to learn, grow, and improve. Whether in breaking the trust of others or having others break the trust in us, the key is in the 4 Cores and 13 Behaviors. Not only do they help us establish trust, but they also enable us to restore it.

INSPIRING TRUST

Nothing is as fast as the speed of trust. Nothing is as profitable as the economics of trust. Nothing is as central to leadership as relationships of trust. And nothing is as inspiring as an extension of trust. Trust is the one thing that changes everything. It brings happiness to relationships, results to work, and confidence to lives.

ABOUT THE AUTHORS

Stephen M. R. Covey

Stephen M. R. Covey is the *New York Times* and #1 *Wall Street Journal* bestselling author of *The Speed of Trust*, which has been translated into 22 languages and has sold over 2 million copies worldwide. He is co-author of the #1 Amazon bestseller *Smart Trust*.

Stephen brings to his writings the perspective of a practitioner, as he is the former President & CEO of the Covey Leadership Center, where he increased shareholder value by 67 times and grew the company to become the largest leadership development firm in the world.

A Harvard MBA, Stephen co-founded and currently leads FranklinCovey's Global *Speed of Trust* Practice. He serves on numerous boards, including the Government Leadership Advisory Council, and he has been recognized with the lifetime Achievement Award for "Top Thought Leaders in Trust" from the advocacy group, Trust Across America/ Trust Around the World.

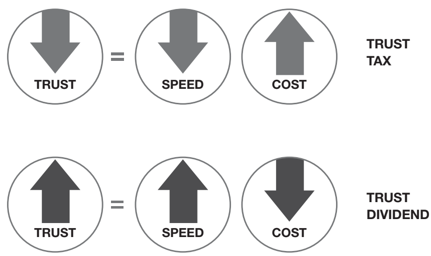
Stephen is a highly-sought after international speaker, who has taught trust and leadership in 54 countries to business, government, military, education, healthcare, and NGO entities.

Rebecca R. Merrill
Rebecca R. Merrill is a gifted writer. In addition to her primary focus on home and family over the years, she has been a writing partner on some of the most significant leadership books written in the last several years. These include *The Speed of Trust* by Stephen M. R. Covey and *You Already Know How to Be Great* by Alan Fine. She also coauthored the *New York Times* bestseller *First Things First* with Dr. Stephen R. Covey and Roger Merrill, and *Life Matters* and *Connections* with Roger Merrill. In addition, she provided assistance to Dr. Covey on *The 7 Habits of Highly Effective People*, *The 7 Habits of Highly Effective Families*, and *The Nature of Leadership*.

Leading at the SPEED OF TRUST®

Trust is an economic driver and always impacts two measureable outcomes: speed and cost.

Water is the vital substance that sustains all life on this planet. When it's there, everything flourishes and grows. When it's not there, everything withers and dies.



The same is true for trust. Where there is no trust, relationships decay, projects fail, customers go to competitors, initiatives underperform, and work grinds to a crawl.

Like a ripple in a pond, trust begins with you.

Leaders who attend the highly interactive Leading at the *Speed of Trust*® work session will increase their personal credibility and practice specific behaviors that increase trust.

As a result, they will be able to **better manage change** and **lead high-performing teams** that are agile, collaborative, innovative, and engaged.

Leaders Get Results — In a Way That Inspires Trust

Instead of just attending a Leading at the *Speed of Trust* work session, leaders learn to apply and sustain a new language and set of behaviors to real work long after they leave the work session. They receive powerful tools and processes to sustain learning for fifty-two weeks following the work session, helping leaders engage their teams in a completely different way to be more committed and accountable to results.

NEW AFTERWORD BY AUTHOR

"This book can change lives!"
—LARRY KING

"I could not put this down. It is exactly what business leaders need today. The author discusses with clarity and insight how 'trusted' leaders do things better, faster, and at lower cost. Everyone should make the time to read this book."
—NOLAN D. ARCHIBALD, former Chairman of the Board and CEO, Black & Decker Corporation

"This much-needed book provides many practical examples of how greater trust produces better results, at less cost, sooner—at work and in life. It's invaluable."
—SPENCER JOHNSON, MD, author of *Who Moved My Cheese?*

"*The Speed of Trust* is absolutely the right book for our times—inspiring, empowering, and immediately useful."
—ROSABETH MOSS KANTER, Harvard Business School; author of *The Change Masters* and *Confidence: How Winning Streaks and Losing Streaks Begin and End*

"Why are you reading the blurbs on this book? Simple, because you trust (a few of) us. Trust drives everything in our nonbranded, too-fast world. So, trust this: This is an important book. The younger Covey has written a book that matters."
—SETH GODIN, author of *Linchpin*

"This is a powerful read: brave, imaginative, amazingly prescient, and backed up by empirical and analytical heft. A must-read for anyone in a position of responsibility, from a support group to a global corporation."
—WARREN BENNIS, author of *On Becoming a Leader*

"*The Speed of Trust* is an amazing book starting with its novel and powerful title—my greatest wonder was why it hadn't been written before."
—TOM PETERS, author of *The Excellence Dividend*
